## Update: River District Transformation Project

With so many exciting developments on the horizon, we're excited about what the 2018 future holds for the City of Sacramento!

Thank you to all of our partners that attended the Transformative Climate Community (TCC) site tour earlier this week to promote the River District Transformation Project (RDTP) proposal and answer questions from the grant review panel. Our ongoing collective partnerships spanning several years is just one of our community assets and it was on full display for staff from the Strategic Growth Council (SGC), Department of Conservation and Department of Housing and Community Development to see.

We are especially grateful for support from Senator Pan, Mayor Steinberg, Councilmembers Jeff Harris and Steve Hansen, and Sacramento County Supervisor Phil Serna. To each of our partners, thank you for all of your hard work - we truly could not have done this without you!

We expect to learn more about the SGC's award decision within the next two weeks and will keep you updated as soon as we have more information.

## What's New at Twin Rivers

Work is already underway at the Twin Rivers Public Housing development as residents continue the relocation process with the support of SHRA's Housing Choice Voucher (HCV) staff and [Urban Strategies, Inc.](#)

With the development project shovel ready, operations have begun to prepare the site for demolition and new construction for mixed housing including public, affordable, and market-rate units. Several trees have already been removed and in partnership with the [Sacramento Tree Foundation](#), the cut trees were collected and re-purposed for other uses. Through the RDTP, more trees will be planted in the target area than what was previously there - improving the shade canopy and health for our residents.
